Elsevier and the DRG e. V. – German Röntgen Society – announce collaboration

The agreement provides society members discounted access to Elsevier's well renowned radiology products STATdx and RADPrimer

Munich, Germany, September 15, 2015 – Elsevier, a world-leading provider of scientific, technical and medical information products and services, has signed a collaboration agreement with the distinguished DRG e. V. (German Röntgen Society).

Together, Elsevier and the DRG are giving society members the opportunity for discounted access to Elsevier's industry-leading radiology platforms STATdx and RADPrimer. In addition, the German Röntgen Museum will receive complimentary access for the duration of the collaboration. With this, Elsevier is supporting the DRG's goals of developing new methods of treatment through medical research, providing high-quality medical education and improving patient care.

Dr. med. Stefan Lohwasser, executive manager of the DRG says, "At the DRG, we aim to ensure the highest quality of medical education and patient care. Providing access to these exceptional radiology platforms, we are certain that we can continue to enable our members to advance and excel in their field. Elsevier's continuing support is giving us and our members the necessary tools and we are delighted about this collaboration."

"We are very pleased to be able to support the DRG in its endeavors." says Robert Anderson, VP Product Management at Elsevier, "Access to these solutions helps radiologists in their day-to-day work and creates the basis for future radiologists and their continuing education. We are very honored to be part of this collaboration."

STATdx is the largest repository of radiologic content in the world. It is written by renowned radiologists in each specialty and provides comprehensive and reliable decision support for radiologists, including over 4,000 common and complex diagnoses, 200,000 expert-selected and annotated image examples, more than 1,300 differential diagnosis modules, comprehensive normal imaging anatomy, 20,000 easily-sortable patient cases, and basic and advanced procedures. It is a unique, easy-to-use, quick online method of answering complex clinical questions.

RADPrimer is a learning environment that helps radiology trainees and radiologists sharpen their diagnostic skills and increase knowledge. This web-based application is ideal for radiology residents/trainees. Radiology groups and institutions can track trainee learning and progress along with documentation and reporting capabilities.
